Section I. Synchrotron radiation sources

I(a). Historical introduction

Synchrotron radiation – 1873 to 1947
Blewett, J.P. 1

I(b). Existing facilities

SRC – Current activities and plans for the future
Huber, D.L. 10
SSRL development – Recent and planned
Bienenstock, A. 13
Update on VUV and soft X-ray facilities at SSRL
Waldhauer, A. 16
Storage rings at Orsay
Marin, P.C. 18

I(c). Future facilities

An ultra-low emittance mode for PEP using damping wigglers
Wiedemann, H. 24
A missing-bending-magnet scheme for PEP
Liu, R.Z. and H. Winick 32
An overview of the advanced photon source
Shenoy, G.K. and D.E. Moncton 38
The LBL 1–2 GeV synchrotron radiation source
Selph, F.B. and the Light Source Design Group 44
Compact electron storage rings
Williams, G.P. 59
Lattice design considerations for compact storage rings
Moser, H.O. 63
The European synchrotron radiation facility
Haensel, R. 68
The Trieste synchrotron radiation project
Cornacchia, M., M. Campagna, L. Fonda, G. Margaritondo, C. Pellegrini, R. Rosei and C. Rubbia 74
Status of the BEPC Synchrotron Radiation Laboratory
Xian, D. 77

I(d). Insertion devices

The X-ray undulator program on PEP
Brown, G.S. 82

0168-9002/88/$03.50 © Elsevier Science Publishers B.V.
(North-Holland Physics Publishing Division)

Multi-undulator beam line V at SSRL: A progress report
Bachrach, R.Z., R.D. Bringans, L.E. Swartz, I. Lindau, B.B. Pate, R.G. Carr, N. Hower, B. Youngman, H. Morales and P. Pianetta 83

First undulator operation at SRC
Green, M.A., M.K. Kelly, B. Lai, R.A. Otte, E.M. Rowe, J.P. Stott, W.S. Trzeciak, D.J. Wallace, W.R. Winter, F. Cerrina, G. Margaritondo, D.L. Huber and H. Winick 91

The performance of the NSLS mini-undulator
Rarback, H., C. Jacobsen, J. Kirz amd I. McNulty 96

The NSLS VUV undulator: spectral characteristics and operating experience
Johnson, P.D., J. Galayda, S.L. Hulbert, R.W. Klaffky, A. Luccio, G. Vignola and C. Jacobson . 106

Photon energy tunability of the advanced photon source undulators
Viccaro, P.J. and G.K. Shenoy 112

The effect of random field errors on the radiation spectra of selected APS undulators
Alp, E.E. and P.J. Viccaro 116

The undulator at BESSY: First operational experience
Pflüger, J., S. Bernstorff, W. Braun, W. Gudat, W. Heinen, G. Isoyama, E.-E. Koch, C. Krausz, P. Kuske, R. Maier, W. Peatman, F. Schäfers, T. Schroeter, R. Weidemann and F.-P. Wolf 120

Design considerations for the insertion devices and beamline front-ends of the ESRF
Elleaume, P. 125

A five-pole superconducting wiggler for the DCI positron ring at LURE
Bazin, C., J.M. Dubuisson, J.P. Jacquemin, J. Perot and D. Raoux 132

I(e). Source instrumentation

Interfacing light source users to the control system
Stott, J.P. 137

Beam position monitors for storage rings
Billing, M.G. 144

Beam steering and stabilizing systems: Present status and considerations for the future
Hettel, R.O. 155

Automatic beam steering in the NSLS storage rings using closed orbit feedback
Nawrocky, R.J., J.W. Bittner, Li Ma, H.M. Rarback, D.P. Siddons and L.H. Yu 164

Beam diagnostics and control at Aladdin
Kleman, K.J. 172

Tolerances in diffraction limited synchrotron light sources
Safranek, J., H. Wiedemann, W. Xie and S. Okuda 177

Measurement of electron beam profile and position using pinhole optics on SPEAR beam line II-3
Troxel, T., G. Brown, J. Cerino and H. Wiedemann 182

Determination of the beam energy of an electron storage ring by using calibrated energy dispersive Si(Li)-detectors
Tegeler, E. and G. Ulm 185

PHOTON: A program for synchrotron radiation dose calculations
Chapman, D., N. Gmür, N. Lazarz and W. Thomlinson 191

Experimental verification of PHOTON: A program for use in X-ray shielding calculations
Bräuer, E. and W. Thomlinson 195

Section II. Integrated beamlines

II(a). Low energy general purpose beamlines

Characteristics and performance of the Los Alamos VUV beamline at the NSLS
Bartlett, R.J., W.J. Trela, F.D. Michaud, S.H. Southworth, R.W. Alkire, P. Roy, R. Rothe, P.J. Walsh and N. Shinn 199

A combined ERG–Seya beamline
Olson, C.G. 205

The General Motors–University of Wisconsin extended range grasshopper beam line
Cerrina, F., H. Hoechst, R. Rosenberg, B. Yates, B. Lai, C. Beall, D. Mancini, D.W. Niles, M.K. Kelly, G. Margaritondo, G.B. Fisher and J.W. Taylor 208

II(b). High energy general purpose beamlines

The SUNY X21B beamline at NSLS: Spectroscopy and versatile surface science facility
Eng, P.J., L.A. Krebs, K.-B. Lee, P.W. Stephens, S. Woronick, K-G. Huang, M.A. Kayed, J. Zegenhagen, W.M. Gibson, D.A. Hansen, J.B. Hudson and J.C. Phillips 210

The ORNL beamline at the National Synchrotron Light Source
Habenschuss, A., G.E. Ice, C.J. Sparks and R.A. Neiser 215

Optical performance of the Naval Research Laboratory's materials analysis beam line at the NSLS
Neiser, R.A., J.P. Kirkland, W.T. Elam and S. Sampath 220

The superconducting wiggler beamport at the National Synchrotron Light Source
Thomlinson, W., D. Chapman, N. Gmür and N. Lazarz 226

An X-ray beam line for the energy range 5–20 keV
Trela, W.J., R.J. Bartlett, F.D. Michaud and R. Alkire 234

Developing a multipurpose SR beam line highly efficient in material characterization
Kawase, Y., J. Mizuki, K. Akimoto, T. Kitano, J. Matsui, S. Sato and Y. Satow 238

The BEPC bending magnet beam port for diffraction, small angle scattering and photoemission research
Shu, D., W. Liu, Z. Cong, Y. Zhang and D. Xian 243

A high energy X-ray scattering beamline for the ESRF
Freund, A.K., M. Hart and J.R. Schneider 247

II(c). Angiography beamlines

Transvenous coronary angiography using synchrotron radiation
Thompson, A.C., R. Hofstadter, J.N. Otis, H.D. Zeman, R.S. Kernoff, E. Rubenstein, J.C. Giacomini, H.J. Gordon, G.S. Brown and W. Thomlinson 252

Design of the angiography beamline for the Argonne Advanced Photon Source
Smither, R.K. and E.M. Westbrook 260

II(d). Lithography beamlines

Status report on X-ray lithography
Wiley, J.D. 270

X-ray lithography beamlines at Aladdin
Wells, G.M., B. Lai, D. So, R. Redaelli and F. Cerrina 278

Synchrotron-based X-ray lithography at Stanford University
Pan, L., P.L. King, P. Pianetta, D. Seligson and T.W. Barbee Jr 287

II(e). Microscopy beamlines

New developments in X-ray microscopy
Kirz, J. 293

X-ray microprobe using multilayer mirrors
Underwood, J.H., A.C. Thompson, Y. Wu and R.D. Giauque 296

MAXIMUM: A scanning photoelectron microscope at Aladdin
Cerrina, F., G. Margaritondo, J.H. Underwood, M. Hettrick, M.A. Green, L.J. Brillson, A. Franciosi, H. Höchst, P.M. Deluca Jr and M.N. Gould 303

Imaging multielement analysis with synchrotron radiation excited X-ray fluorescence radiation
Bavdaz, M., A. Knöchel, P. Ketelsen, W. Petersen, N. Gurker, M.H. Salehi and T. Dietrich 308

Two-dimensional laser interferometric encoder for the soft X-ray scanning microscope at the NSLS
Shu, D., D.P. Siddons, H. Rarback and J. Kirz 313

Elemental measurements with an X-ray microprobe of biological and geological samples with femtogram sensitivity
Thompson, A.C., J.H. Underwood, Y. Wu, R.D. Giauque, K.W. Jones and M.L. Rivers 318

Zone plate lenses for X-ray microscopy
Vladimirsky, Y., D.P. Kern, T.H.P. Chang, D.T. Attwood, N. Iskander, S. Rothman, K. McQuaide, J. Kirz, H. Ade, I. McNulty, H. Rarback and D. Shu 324

II(f). Other special purpose beamlines

A new apparatus for the study of nuclear Bragg scattering
Siddons, D.P., J.B. Hastings and G. Faigel 329

Design of NSLS undulator beamline U5 for spin-polarized photoemision spectroscopy
Anacker, D. and J.L. Erskine 336

Proposed dedicated high pressure beam lines at CHESS
Ruoff, A.L., Y.K. Vohra, W.A. Bassett, B.W. Batterman and D.H. Bilderback 344

A beamline for layered synthetic microstructure studies
Boudry, J., C. Riedel, B. Edwards, M. Lagally, R. Redaelli, F. Cerrina, C. Falco, F. Fernandez, J.H. Underwood and M. Hettrick 351

Design of a transuranic VUV spectrometer
Arko, A.J. 356

Section III. Beamline instrumentation

III(a). Windows

The mechanical design of thin beryllium windows for synchrotron radiation
Brodsky, E.L. 358

Analysis of surface contaminants on beryllium and aluminum windows
Gmur, N.F. 362

Replaceable Be and Al windows for X-ray beam lines
Oversluizen, T. and P.M. Stefan 375

III(b). Mirrors

In situ reactive cleaning of X-ray optics by glow discharge
Johnson, E.D. and R.F. Garrett 381

Oxygen rf-discharge cleaning: plasma characterization and implementation on a grasshopper beam line
Rosenberg, R.A. and D.B. Crossley 386

Computer controlled machining of bent mirrors
Cerrina, F., D.J. Wallace, C.H. Pruett and N.C. Lien 392

A simple cantilevered mirror for focusing synchrotron radiation
Ice, G.E. and C.J. Sparks 394

High-flux, elliptically-bent, UHV-compatible mirror with simple external bending mechanism for beam line X9A at NSLS
Rosenbaum, G., L. Rock and M. Sullivan 399

Manually and remotely operated ultra-high-vacuum double-axis mirror manipulators for the infrared beamline at the NSLS
Shleifer, M., E. Smith and G.P. Williams 402

III(c). Grating monochromators

High resolution gratings for the soft X-ray
Hettrick, M.C. 404
Soft X-ray grating efficiencies: Reciprocity theorem, blaze maximum and isoefficiency curves
Jark, W. 414
Performance tests of the ERG monochromator at NSLS-U1
Sansone, M., R. Hewitt, W. Eberhardt and D. Sondericker 422
Performance of the SURF-II high-throughput toroidal grating monochromator
Kurtz, R.L., D.L. Ederer, J. Barth and R. Stockbauer 425
Stigmatic monochromators for synchrotron sources
Pouey, M. 430
The optical system for a 1 m Seya–Namioka monochromator in the SRRC beam line
Chang, C.-N., C.-I. Chen and Y.-F. Song 436

III(d). Layered synthetic microstructures

Applications of multilayers to synchrotron radiation
Pianetta, P. and T.W. Barbee Jr 441
Time-resolved X-ray scattering using a high-intensity multilayer monochromator
Stephenson, G.B. 447
Multilayer-coated mirrors as power filters in synchrotron radiation beamlines
Kortright, J.B., P. Plag, R.C.C. Perera, P.L. Cowan, D.W. Lindle and B. Karlin 452

III(e). Crystal monochromators

A versatile two/four crystal monochromator for X-ray absorption spectroscopy
Heald, S.M. 457
Mosaic crystal monochromators for synchrotron radiation instrumentation
Freund, A.K. 461
UHV double crystal monochromator design
Morrison, T.I., N.C. Lien, S.M. Heald, L.S. Fareria and J. Scrofani 467
A closed loop feedback system for synchrotron radiation double crystal monochromators
Ramanathan, M., M. Engbretson and P.A. Montano 471
High-flux, UHV-compatible, water-cooled double crystal monochromator for beam line X9 at NSLS
Rosenbaum, G., L. Rock, M. Sullivan and S. Khalid 475
Design of a tunable and focusing single crystal monochromator for powerful X-ray sources
Schildkamp, W. 479
A special design for a wide range monochromator on the wiggler beamline at LURE-DCI
Frouin, J., Y. Garreau, G. Loupias, D. Raoux and J. Tarbes 484

III(f). Thermal considerations

Mirror and grating surface figure requirements for grazing incidence synchrotron radiation beam lines: Power loading effects
Hulbert, S.L. and S. Sharma 491
A water-cooled mirror system for synchrotron radiation
DiGennaro, R., B. Gee, J. Guigli, H. Hogrefe, M. Howells and H. Rarback 498
Finite element analysis of a SiC mirror receiving synchrotron radiation
Dormiani, M. 507
Thermal deformations in a high flux beam position monitor
Sharma, S. and M. Woodle 513

Liquid gallium metal cooling for optical elements with high heat loads
Smither, R.K., G.A. Forster, C.A. Kot and T.M. Kuzay 517
History of thermal/stress analysis methods used at the Stanford Synchrotron Radiation Laboratory
Youngman, B.P. 525

III(g). Miscellaneous

Phase-plate performance for the production of circularly polarized X-rays
Mills, D.M. 531
Vibration isolation and damping for long focal length synchrotron radiation instruments
Hansen, R.W.C., E. Brodsky, S. Collier, C.H. Pruett, A. Salehzadeh, D. Wallace and F. Middleton 538
SHADOW: New developments
Lai, B., K. Chapman and F. Cerrina 544

Section IV. Research instrumentation

IV(a). Particle analysers and detectors

Electron spin polarization analyzers for use with synchrotron radiation
Pierce, D.T., R.J. Celotta, M.H. Kelley and J. Unguris 550
Construction of an ellipsoidal mirror analyzer for ion detection
Stockbauer, R. and A. Pararas 560

IV(b). Photon analysers and detectors

CCD sensors in synchrotron X-ray detectors
Strauss, M.G., I. Naday, I.S. Sherman, M.R. Kraimer, E.M. Westbrook and N.J. Zaluzec 563
Area detectors for X-ray spectroscopy
Callcott, T.A., K.-L. Tsang, C.H. Zhang, D.L. Ederer and E.T. Arakawa 578
A 13-element Ge detector for fluorescence EXAFS
Cramer, S.P., O. Tench, M. Yocum and G.N. George 586
PDA systems for energy dispersive EXAFS
Allinson, N.M., G. Baker, G.N. Greaves and J.K. Nicoll 592
Semiconductor detector performance for low-energy X-rays
Jaklevic, J.M., J.T. Walton, R.E. McMurray Jr, N.W. Madden and F.S. Goulding 598
Pin diode detectors for synchrotron X-rays
Kirkland, J.P., T. Jach, R.A. Neiser and C.E. Bouldin 602
A comparison of three detectors for soft X-ray dosimetry
Meger, C.M., D.W. Pearson, P.M. Deluca Jr, G.M. Wells, R. Redaelli and F. Cerrina 608
Soft X-ray dosimetry and its application on the lithography beamline at SSRL
Seligson, D., L. Pan, P. King and P. Pianetta 612
The HgI_2 array detector development project
Iwanczyk, J.S., W.K. Warburton, B. Hedman, K.O. Hodgson and A. Beyerle 619

IV(c). Image plates

Storage phosphor X-ray diffraction detectors
Whiting, B.R., J.F. Owen and B.H. Rubin 628
Protein crystallographic data acquisition and preliminary analysis using Kodak storage phosphor plates
Bilderback, D., K. Moffat, J. Owen, B. Rubin, W. Schildkamp, D. Szebenyi, B. Smith Temple, K. Volz and B. Whiting 636

Design and performance of an imaging plate system for X-ray diffraction study
Amemiya, Y., T. Matsushita, A. Nakagawa, Y. Satow, J. Miyahara and J.-I. Chikawa 645

IV(d). Scattering and diffraction

A high-vacuum triple-axis-diffractometer for soft X-ray scattering experiments
Jark, W. and J. Stöhr 654
A time-resolved scattering data acquisition system at the SUNY X21A beamline at NSLS
LeGrand, A.D., W.F. Lehnert and J.C. Phillips 659
High resolution powder diffraction at Hasylab
Wroblewski, T., J. Ihringer and J. Maichle 664

IV(e). Miscellaneous

A Microvax compatible data acquisition system for the collection of time-resolved X-ray data
Pollock, V. and D.M. Mills 668
Instrumentation for combined laser–synchrotron photoemission experiments
Long, J.P. 673

Section V. Research applications

New trends in X-ray standing waves
Bedzyk, M.J. 679
Direct observation of surface standing waves in Mo–Si multilayers
Lai, B., G.M. Wells, R. Redaelli, F. Cerrina, K. Tan, J.H. Underwood and J. Kortright 684
The development of a silicon nitride mask technology for synchrotron radiation X-ray lithography
Visser, C.C.G., J.E. Uglow, D.W. Burns, G. Wells, R. Redaelli, F. Cerrina and H. Guckel 686
Ozone production due to synchrotron radiation
Weilandics, C., N. Rohrig and N.F. Gmür 691
Investigation of fragmentation processes following core photoionization of organometallic molecules in the vapor phase
Nagaoka, S.-I., S. Suzuki and I. Koyano 699

Author Index 705
